Project Name: AI Powered Debt Relief & Financial Recovery Platform	Maximum Marks: 5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functionalities correctly.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Repository Link / URL	https://github.com/umesh275/AI-Powered-Debt-Relief-Financial-Recovery-Platform
Programming Language(s)	Python, JavaScript, HTML, CSS
Framework(s) Used	FastAPI, React.js, Bootstrap, SQLAlchemy
Key Features Implemented	User Registration & Login, Debt Analysis, Payment Plan Recommendation, Dashboard, Notifications, AI Settlement Prediction, Letter Generation
Pending/Incomplete Features	AI Chatbot Integration, SMS Alerts
Setup/Run Instructions	1. Clone the repository 2. Install dependencies (see README.md) 3. Configure the database in config.py 4. Run the application using app.py

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions/classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments/documentation where necessary	Yes
4	Coding standards and best practices are followed	Yes

S.No	Criteria	Status (Yes / No)
5	No syntax errors or warnings in the code	Yes
6	Error handling is implemented properly	Yes
7	Code is efficient and optimized where necessary	Yes
8	All required features work as expected	Yes
