

Scalability & Future Plan

Date	5 July 2026
Team ID	SWTID-2026-5455
Project Name	AI Powered Debt Relief & Financial Recovery Platform
Maximum Marks	1 Mark

Scalability & Future Plan:

The platform is built to scale with growing user demand and evolving financial needs. In the coming years, it will incorporate advanced AI models, real-time financial data, and cloud infrastructure to enhance performance, user experience, and support for a larger audience.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Limited to single currency & region	Restricts global usage	High
2	Dependence on third-party APIs (e.g., Gemini AI)	API downtime may affect service	Medium
3	Basic fraud detection (rules-based)	May miss complex fraudulent patterns	Medium

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Supports limited concurrent users	Implement load balancing and auto-scaling using cloud infrastructure
2	Data Storage	SQLite (local storage)	Migrate to PostgreSQL / Cloud SQL for high availability and scalability
3	Performance	Suitable for small-scale usage	Optimize queries, add caching (Redis), and improve response time
4	Security	Basic authentication & authorization	Implement role-based access, 2FA, encryption and advanced security policies

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 1	Mobile Application (Android & iOS)	6 Months	Improve accessibility and user engagement
Phase 2	Integration with Banks & Credit Bureaus	12 Months	Enable real-time data & accurate analysis
Phase 3	Advanced AI & Predictive Analytics	18 Months	Smarter predictions and personalized insights
Phase 4	Multi-language & Global Expansion	24 Months	Broader audience and global reach
